

Cisco Splunk ITSI - PoV Quick Start

Core Competencies

Programming

Web Servers

Certifications

Splunk IT Service Intelligence (ITSI) equips organizations with the agility, tools and visibility required to protect today's business-critical services and their hybrid environments. Splunk IITSI is an AIOps, analytics and IT management solution that helps teams predict incidents before they impact customers. Using AI and machine learning (ML), ITSI correlates data collected from monitoring sources and delivers a single live view of relevant IT and business services, reducing alert noise and proactively preventing outages.

At OnStak, we specialize in Splunk ITSI implementation and integration services to expedite adoption of AIOps/IT management. As part of this Quick Start POV service offer, our subject matter experts (SME) partner with your team to ensure a smooth solution definition, deployment of Splunk ITSI solution in the lab or production environment and provide knowledge transfer to equip your staff with the necessary skills to configure and manage the Splunk ITSI Solution.
